Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-7 rejected under 35 U.S.C. 103(a) as being unpatentable over Brown et al (U.S. Patent Application Publication No. 2003/0111570) in view of Watanabe (U.S. Patent No. 4,436,253).

With respect to Claims 1-7, Brown et al, Figures 1-7, teach a tape cartridge including a cartridge case having a tape exit opening portion formed by connecting an upper shell and a lower shell, a tape reel rotatably housed in said cartridge case, and a leader block connected to one end of a tape wound around said tape reel; said leader block having a block body, and a clamp member that is press-fit to a concave portion formed on a side surface portion of the block body and that nips the end of said tape with said block body; said tape cartridge characterized in that: said clamp member comprises: a base portion that is press-fit to said concave portion to form a part of the side surface portion of said block body. Watanabe, Figure 3, teaches a pair of leg portions that are formed on inner surface sides of said base portion in the direction of the width of said tape; and nail portions that are formed on outer surface sides of said pair of leg portions and that are secured to securing grooves formed in side walls of said concave portion. It would have been obvious to one of ordinary skill in the art to provide Brown et al with leg and nail portions, as taught by Watanabe, for the purpose of preventing the

tape from slipping off from the recess of the block when the tape is subjected to an undesired stretching force.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
